Dear Legislators,

My name is Jim Carpenter. My company name is Carpenter Construction LLC.

I am writing in opposition of proposed bill SB 292.
We should not forcefully require new construction to use other energy sources, such as all electric when we do not have the electric capacity to serve these newly built homes. We hear the warnings ever year when it gets hot to try and reduce electric usage. The new energy codes already in use make our new homes incredibly efficient and not wasteful in the least. Plain and simple , we just aren't ready for this at all.

Best Regards,
Jim Carpenter
